

Revolution Plus

Revolution Plus Automatic down-packing strapping system

Increases Productivity

Fast cycle times enable up to 60-65 bales per hour

Quick-change Technology

Modularity streamlines operation and maintenance

Simplifies Integration

Designed to be compatible with all presses

Maximizes Reliability

Z-weld joint provides optimal performance

Revolution Plus

Automatic down-packing strapping system

Signode's fully automatic Revolution Plus down-packing strapping system is designed to accommodate faster production speeds, while increasing efficiency throughout the baling phase. Manufactured with innovative technology developed specifically to address ginning challenges, the Revolution Plus streamlines operation, providing unmatched efficiency and output.

Features and benefits

■ Simplifies operation

The Revolution Plus down-packer includes automatic refeed, ensuring smooth, uninterrupted operation to improve overall productivity.

■ Streamlines maintenance and troubleshooting

The Revolution Plus features a modular design with lightweight, easy to access feed/take-up and sealing modules. To further maximize productivity, sealing modules can be removed and replaced between bales, allowing operators to perform general maintenance while continuing to operate at full capacity.

Module side

■ Ensures superior joint reliability

By incorporating Signode's patented Z-weld sealless joint along with technology to improve weld consistency, the Revolution Plus delivers reliable, dependable performance bale after bale.
